ISN Expands into Uranium Mining Sector

CALGARY, Alberta (January 25, 2012)—ISN is pleased to announce that Cameco has selected the ISNetworld tool to support its contractor management program. ISN will assist Cameco with establishing a formal and standardized process for collecting and verifying health, safety, environmental, and insurance information on contractors in support of the contractor management program.

Cameco is a world leader in low-cost uranium production. Production from Cameco's mines in Canada, the US, and Kazakhstan accounts for about 16% of the world's total production. Cameco is also a leading provider of processing services required to produce fuel for nuclear power plants.

"Cameco is pleased to have ISN as a team member of our Contractor Management Program," said Kari Lamont, Health Physicist, SHEQ, Compliance & Licensing. "We expect their involvement will further enhance health and safety programs at our work sites."

"Cameco has shown they are dedicated to the health and safety of their employees, contractors and the community," said Kim Cravens, ISN Canada Senior Manager. "We believe their overall commitment to safety will lead to a successful implementation and an easy transition for their contractors."

About ISN

ISN provides an online contractor management database, ISNetworld, which is designed to meet internal and governmental record keeping and compliance requirements. ISN collects health and safety, procurement, quality and regulatory information for more than 38,000 contractors and 240 Owner Clients. Through its Review and Verification Services (RAVS), ISN's subject matter experts review and verify contractors' self-reported information, incorporating a level of due diligence to the process. Contractors also use the system to manage internal training and recording keeping requirements. For more information, visit www.isn.com.
