ENMAX Corporation Selects ISNetwork for Vendor Management *ISN expands with a Canadian Electricity Owner Client*

CALGARY, Alberta (May 1, 2010) — ENMAX Corporation (ENMAX) announced that it has selected ISNetwork (ISN) for vendor prequalification services. Using ISN's services is intended to enhance safety, efficiency, quality and environmental management, all in a one-stop shop approach.

"Many of ENMAX's vendors already are subscribers to ISN's services, and outsourcing the prequalification process for new vendors to ISN brings a number of benefits," explained Dave Rehn, EVP, Generation and Wholesale Energy. "ENMAX has stringent safety requirements and using ISN's services will improve our overall performance in this key area. A tight control over our quality and environmental management programs will be an added bonus. We look forward to the day when our entire supplier base is part of ISN. We see it as a win/win/win for ENMAX, our vendors and ISN."

The ISN team continuously looks to enhance its product and services. As ENMAX begins this strategic relationship, the ISN team, is already evaluating further enhancements to vendor evaluation assessment in the areas of finance, credit, legal name/entity status and others.

"We are excited to welcome ENMAX as ISN's first Owner Client in the electricity industry in Canada," said Adrienne Turner, Director of New Business, ISN Canada. "ENMAX is already challenging ISNetwork to continue to expand and grow our services to meet the needs of our Owner Clients in new industries."

ISN Senior Vice President Brian Callahan added, "With the addition of ENMAX, there is an increase in value to our current ISNetwork vendors in Alberta. Over the past years, ISN has expanded from its origins in Canadian Upstream Oil & Gas to accommodate the needs of other industries, such as Mining, Power Generation, Pulp & Paper, etc. We are pleased to announce our expansion in the electricity industry as we begin our relationship with ENMAX."

About ISNetworld

ISNetworld provides an online vendor management database designed to meet internal and governmental record keeping and compliance requirements. ISN collects health and safety, procurement, quality and regulatory information for more than 24,000 vendors and 145 Owner Clients. Through its Review and Verification Services (RAVS), ISN's subject matter experts review and verify vendors' self-reported information, incorporating a level of due diligence to the process. Vendors also use the system to manage internal training and recording keeping requirements. For more information, visit www.isnetworld.com.

About ENMAX Corporation

ENMAX Corporation, through subsidiaries and predecessors, has provided Albertans with safe and reliable electricity for more than 100 years. ENMAX Corporation provides electricity, natural gas and value-added services to more than 640,000 residential, commercial and industrial metered customer locations in Alberta. ENMAX Energy Corporation, a subsidiary of ENMAX Corporation, is Alberta's leading competitive electricity retailer. Through subsidiaries, ENMAX Energy is one of Alberta's largest investors in renewable energy and was the first Canadian electricity retailer to offer customers the option to support wind generated energy. As well, ENMAX Corporation, through its subsidiary ENMAX Envision Inc., provides fibre optic networks for high speed data and internet communications. Visit our website at enmax.com.
