**ISNetworld Works with Kaplan EduNeering to Provide Comprehensive Training Record Keeping Program for Leading Alaskan Oil Exploration Company**

**Dallas, TX, October 9, 2008** –Kaplan EduNeering has been chosen to provide a comprehensive online training program and ISNetworld will serve as the record keeping program for a leading Alaskan oil exploration company. Kaplan EduNeering will provide health, safety and environmental (HSE) training for the company’s local employees and several thousand outside contractors in the company’s Alaskan oil and exploration operations. This program will enable the company to achieve compliance with the Alaska Department of Environmental Conservation’s Hazardous Substances Pollution Control Regulations.

Kaplan EduNeering will build custom courses, which will be used as part of the company’s mandatory training program for subcontractors. The courses will be specific to the job performed and the job location. The course will cover topics such as oil discharge prevention to energy source hazard recognition, permit-specific issues, defensive driving and polar bear awareness. A test will be given at the end of each course to assure understanding of the subject matter.

The completed coursework records will then be uploaded into ISNetworld. The company will then be able to review the training information to assure the contractor has been trained on safety in that particular field. ISNetworld is used to ensure that contractors are meeting health, safety and environmental requirements for compliance.

Brian Callahan, Vice President of ISN stated, “We are excited to be working with Kaplan EduNeering to serve our mutual client’s needs. Together we can ensure that contractors are trained and compliant with Alaska’s pollution control regulations.”

**About ISNetworld**

ISNetworld provides an online contractor/supplier management database designed to meet internal and governmental health, safety, and environmental requirements. ISNetworld Review and Verification Services (RAVS) validate contractor/supplier information. ISNetworld communicates health and safety standards and provides a method for subscribers to house documents, measure, compare and benchmark health and safety statistics, and provides a method of evaluation and communication between companies and their contractors. Contractor/suppliers also use the system to manage training and record keeping requirements. For more information, visit [www.isnetworld.com](http://www.isnetworld.com).
