ISNetworld Expands into Australia

Dallas, TX, December 5, 2008– ISNetworld announced today that Chevron Australia has selected ISNetworld as its primary tool for enhancing their contractor management. After working with Chevron North America for several years, ISN is looking forward to working with Chevron Australia and expanding into the Australian marketplace.

Chevron Australia will be ISNetworld’s first Australian client. As the largest holder of untapped natural resources in Australia, Chevron Australia has played a vital role in providing Australia, Asia, and other areas around the globe with energy as the need continually grows. Chevron has been involved in exploration and production in Australia since the early 1950’s and today their operations include developments in the North West Shelf Venture, Barrow and Thevenard Islands, and the Greater Gorgon Area. Chevron Australia is also running a vigorous offshore exploration program in the Northwest region of Australia.

Melanie Gordon, with ISNetworld’s upstream offshore operations, stated, “We look forward to furthering our relationship with Chevron and many others in Australia as we continue to help both Owner Clients and contractor companies mitigate risk and improve safety performance.”

ISNetworld Vice President Brian Callahan stated, “As Chevron Australia has made such a huge contribution to the natural gas industry of the Asia-Pacific region, we are pleased to have them as our first Australian client. This is an important accomplishment for ISNetworld as we further our efforts in expanding into the global marketplace and continue to help our clients and contractors maintain a safe work environment.”

President of ISNetworld, Joe Eastin, added, “ISNetworld views our new relationship with Chevron Australia as an important accomplishment as they are one of Australia’s largest providers of untapped natural resources. This is an integral step in continuing our global growth, and we are looking forward to building more relationships with Owner Clients and Contractor companies in Australia and Asia. As we build our clientele in the Australian marketplace, we will be able to aid these companies in decreasing work-related incidents as we communicate industry health and safety expectations.”

About ISNetworld

ISNetworld provides an online contractor/supplier management database designed to meet internal and governmental health, safety, and environmental requirements. ISNetworld

Review and Verification Services (RAVS) validate contractor/supplier information. ISNetworld communicates health and safety standards and provides a method for subscribers to house documents, measure, compare, and benchmark health and safety statistics, and provides a method of evaluation and communication between companies and their contractors. Contractor/Suppliers also use the system to manage training and recording keeping requirements. For more information, visit www.isnetworld.com.
