ISNetworld Breaks 500,000 DOT OQ Qualifications Mark

Dallas, TX, January 22, 2003 – ISN Software Corporation (ISN) announced today that ISNetworld now contains compliance records that include over 500,000 Department of Transportation (DOT) Operator Qualification (OQ) qualifications.

Bill Addy, President of ISN, said, “We want to thank our customers for choosing and using ISNetworld. The DOT OQ rule record-keeping requirement is complex and potentially onerous. ISNetworld simplifies administration while maximizing integrity through the direct incorporation of third party data wherever feasible. Operators and contractors alike have voted and ISNetworld is the hands down favorite.”

Joe Eastin, Executive Vice President of ISN added, “As far as we can tell, the next largest record keeping system has about 10% of the qualification information that ISNetworld has. In addition, ISNetworld is the only record keeping system that imports assessment results directly from third party assessment organizations. ISNetworld is the one place where we can all see the industry making progress to implement the DOT OQ rule on a minute by minute basis.”

ISN Software Corporation, through its flagship ISNetworld product, automates the relationship between contractors and their owner/operator customers in America’s most capital-intensive industrial sectors. ISNetworld utilizes third party data wherever possible to create an added level of compliance record management and reporting integrity. For more information, visit www.isnetworld.com.
