ISNetworld Implements First Refining & Chemical Companies

Dallas, TX, October 14, 2005 – ISN Software Corporation (ISN) announced that Valero Energy Corporation (Valero) has recently joined ISNetworld as the first refining organization to include its network of refineries. In addition, ISN announced that Celanese International Corporation (Celanese) has joined ISNetworld as the first chemical company to be served by ISN.

In March 2005, Valero Energy began implementing ISNetworld with its contractors. Julie Polk, a Director of Business Development for ISN, said “Valero's network of refineries use ISNetworld’s Standardized Contractor Questionnaire – Verified (SCQ-V) to manage and evaluate their contractors’ HSE information. In addition, Valero Refineries also use ISNetworld's OSHA log and Insurance documentation management tools. Selected sites will be evaluating contractor's Financial information using ISNetworld's Financial Questionnaire. For contractors affected by the Department of Transportation's Operator Qualification (OQ) regulation, Valero utilizes ISNetworld's OQ reporting function to manage compliance records.”

Ms Polk added “In June 2005, Celanese implemented ISNetworld with their contractors. Their plants utilize the SCQ-V, Document Manager and, most recently, the new Audit Manager.”

ISN Software Corporation, through its flagship ISNetworld product, automates the relationship between contractors and their owner/operator customers in America’s most capital-intensive industrial sectors. ISNetworld utilizes third party data wherever possible to create an added level of compliance record management and reporting integrity. For more information, visit www.isnetworld.com.
