Sunoco, Inc. Commences National Rollout of ISNetwork

Dallas, TX, February 24, 2006 – ISN Software Corporation (ISN) announced today that Sunoco, Inc. (Sunoco) has begun implementing ISNetwork and ISN RAVS (Review and Verification Services) across all of its domestic refineries. ISNetwork is the leading online database serving operators and contractors in the oil, gas and petrochemical industries. ISN RAVS will review and verify certain contractor information and the results will be incorporated into ISNetwork.

Joe Eastin, Executive Vice President of ISN, said, “Sunoco is one of the largest independent refiners in our country. The economic and strategic importance of the domestic refining industry has never been greater. We are proud that Sunoco has chosen ISN and ISNetwork to assist them as they seek to improve the vital partnership that exists between Sunoco and the contractors it depends upon.”

Julie Polk, Director of ISN’s Refining and Chemical Business Unit, added, “Sunoco’s geographic footprint overlaps in several areas with existing ISNetwork owner/operators. For Sunoco contractors that are already ISNetwork subscribers, there are additional Sunoco specific requirements, but no additional fee. For new ISNetwork contractor subscribers, we look forward to the opportunity to serve you with the best customer service team in the industry.”

ISN Software Corporation, through its flagship ISNetwork product, automates the relationship between contractors and their owner/operator customers in America’s most capital-intensive industrial sectors. ISNetwork utilizes third party data wherever possible to create an added level of compliance record management and reporting integrity. For more information, visit www.isnsoftware.com.
