### **Devon Canada Corporation Selects ISNetworld for Contractor Database**

**Dallas, TX, June 2007** – ISN Software Corporation (ISN) announced today that the Canadian division of Devon Energy Corporation has selected ISN and ISNetworld to assist in enhancing its contractor management process. Devon Energy’s US division has been an ISNetworld customer since February 2004.

Located in Calgary, Alberta, Devon Canada is one of Canada's leading independent oil and gas exploration and production companies. Approximately 88 percent of Devon Energy Corporation’s 4,600 employee operation is located in North America, primarily the United States and Canada. Ranking third among independent gas producers in Canada, the company’s production consists of approximately 60 percent natural gas and 40 percent oil and natural gas liquids, such as propane, butane and ethane. Aside from conventional reservoirs, Devon Energy also pursues interests in thermal heavy oil properties and pilot projects for coal bed methane. In recent years, Devon has also successfully expanded it’s assets into about six million acres into countries such as Azernaijan, China and Brazil.

Brian Callahan, Vice President of ISN’s Petro-Chemical Business Units, said, “Devon Canada is an industry leader with international operations. Devon Canada’s membership in ISNetworld is an important milestone for ISNetworld and the global market.”

Adrienne Turner, Sr. Manager of ISN, added, “Devon Canada and its contractors are joining a network of over 100 Owner Clients and over 9,000 contractors across North America that rely on ISNetworld. We are pleased to provide Devon Canada, its contractors and all ISNetworld users the very best customer service and data management tools available to industry.”

ISN Software Corporation, through its flagship ISNetworld product, automates the relationship between contractors and their Owner Clients in North America’s most capital-intensive industrial sectors. ISNetworld utilizes third party data wherever possible to create an added level of compliance record management and reporting integrity.
