ISNetworld Houses Over 100,000 SafeGulf Records

Dallas, TX, April 19, 2007 – ISN Software Corporation (ISN) announced today that ISNetworld now houses over 100,000 individual SafeGulf records. Led by Chevron, Shell, BP and ExxonMobil, SafeGulf is an initiative to standardize Offshore Orientation in the Gulf of Mexico. In May of 2005, the SafeGulf Advisory Group selected ISN as the database to house and verify SafeGulf orientation records. ISN's program design, reporting and tracking tools are integral parts of the SafeGulf initiative. ISNetworld provides Owners with desktop and mobile access to verify an individual's Offshore Orientation results to help ensure safety and reliability when working offshore.

Tim Elsen, Chevron Gulf of Mexico Contractor Safety Specialist, added "Chevron Gulf of Mexico is committed to increasing safety and standardizing best practices in the industry. SafeGulf and ISNetworld are integral parts of Chevron Gulf of Mexico's commitment to both."

Joe Eastin, President of ISN, said, "The SafeGulf initiative is an excellent example of industry standardization around orientation requirements, data collection and compliance. SafeGulf helps ensure that all offshore workers have met minimum orientation requirements."

ISN Software Corporation, through its flagship ISNetworld product, automates the relationship between contractors and their owner/operator customers in North America's most capital-intensive industrial sectors. ISNetworld utilizes third party data wherever possible to create an added level of compliance record management and reporting integrity. For more information, visit www.isnetworld.com.
