**Devon Energy Corporation Selects ISNetworld for Onshore E&P
Compliance Records Management**

Dallas, TX, February 26, 2004 – ISN Software Corporation (ISN) announced today that Devon Energy Corporation (Devon) has selected ISNetworld and the SCQ-V (Verified Standardized Contractor Questionnaire) as its online solution to automating an important element of contractor compliance records management.

Joe Eastin, Executive Vice President of ISN, said, "Devon has grown rapidly in recent years and has become the largest U.S.-based independent producer. Devon's operations are centered in North America and the Gulf of Mexico, with additional reserves distributed internationally."

"We have worked closely with David Templet, Environmental Health and Safety manager, to make sure ISNetworld and the SCQ-V aligned with Devon's requirements. Among the elements Devon needed from ISN were the ability to rapidly enroll a large number of contractors and keep up with Devon's expanding compliance needs as a growing company."

Mr. Eastin continued, "We are proud to count Devon Energy Corporation among our growing base of industry operators that use ISN for contractor information management. We welcome Devon and its contractors to ISNetworld."

ISN Software Corporation, through its flagship ISNetworld product, automates the relationship between contractors and their owner/operator customers in America's most capital-intensive industrial sectors. ISNetworld utilizes third party data wherever possible to create an added level of compliance record management and reporting integrity. For more information, visit www.isnetworld.com.
