ChevronTexaco Exploration & Production Company's San Joaquin Valley Business Unit Becomes First Onshore E&P ISNetworld Owner

Dallas, TX, February 24, 2004 – ISN Software Corporation (ISN) announced today that ChevronTexaco Exploration & Production Company's San Joaquin Valley Business Unit has signed up as ISNetworld's first onshore E&P operator, selecting ISNetworld and the SCQ-V (Standardized Contractor Questionnaire - Verified) as its online solution to automating an important element of contractor compliance records management.

Joe Eastin, Executive Vice President of ISN, said, "ChevronTexaco Exploration & Production Company's San Joaquin Valley Business Unit is a terrific organization. Their operations in Bakersfield and the surrounding area include several large onshore fields. A number of their contractors already subscribe to ISNetworld and their addition as an ISNetworld operator should simplify their compliance record keeping burden."

Julie Polk, Senior National Account Manager with ISN, added, "We are also proud to announce that, with the addition of the San Joaquin Valley Business Unit, we now have three ChevronTexaco organizations (ChevronTexaco Exploration & Production Company's Gulf of Mexico and San Joaquin Valley Business Units, and Chevron Environmental Management Company) that rely on ISN and ISNetworld to reduce the cost and increase the quality of contractor compliance record keeping."

ISN Software Corporation, through its flagship ISNetworld product, automates the relationship between contractors and their owner/operator customers in America's most capital-intensive industrial sectors. ISNetworld utilizes third party data wherever possible to create an added level of compliance record management and reporting integrity. For more information, visit www.isnetworld.com.
