ISM On-Site Audit Results Coming to ISNetworld

Dallas, TX, September 17, 2003 – ISN Software Corporation (ISN) announced today that International Safety Management (ISM) has selected ISNetworld to make its on-site audit results available to operators. ISM specializes in conducting on-site audits of contractor health, safety and environmental (HSE) programs.

Joe Eastin, Executive Vice President of ISN, said, “We met Jerome LeBlanc, the President of ISM, in August of 2002. At that time, a number of operators expressed their desire to have on-site HSE audit results available in ISNetworld to compliment SCQ-V and NCMS desktop audit results already residing within ISNetworld. Since that first meeting, we have been collaborating with Jerome to adapt ISNetworld to fit operator requirements. We are proud to have ISM as our newest data provider.”

Bill Addy, President of ISN, added, “On-site audits are becoming more important. They add an extra level of assurance that organizations are in compliance with operator and regulatory requirements. ISM brings this important, third party compliance data to ISNetworld. We welcome Jerome and the ISM team as our newest ISNetworld data provider.”
