Shell Canada Energy and Shell Exploration and Production Company Select ISNetworld for Contractor Management

CALGARY, Alberta, October 6, 2008 – ISNetworld (ISN) announced today Shell Canada Limited and Shell Exploration and Production Company will join Shell Pipelines in utilizing ISNetworld as its primary tool for contractor management. Shell Pipelines has been utilizing ISNetworld in the United States for several years.

Shell Canada Energy is one of the largest integrated petroleum companies in Canada, producing, natural gas, natural gas liquids and bitumen. It is also the country's largest producer of sulphur. Shell Canada Energy is a leading manufacturer, distributor and marketer of refined petroleum products.

Shell Exploration and Production Company is the largest of the Shell E&P operating units employing approximately 2,750 people in the U.S. They have been operating in the Gulf of Mexico for five decades. Their oil and gas production in the Gulf accounts for more than 80 percent of their overall U.S. production.

Brian Callahan, Vice President, stated, "We are happy to have Shell Canada Energy and Shell Exploration and Production Company on board. Royal Dutch Shell (RDS) acquired Shell Canada Limited last year and ISNetworld allows Shell Canada Limited's business units to comply with RDS reporting standards. ISNetworld aligns with the RDS global standardization requirements while accounting for specific business units needs."

ISNetworld President, Joseph Eastin, added, "Shell is a global leader and takes pride in its efforts to maintain safety for their staff and contractors. We are confident their implementation and use of ISNetworld will enhance their ability to reach their goal for incident free operations."

About ISNetworld

ISNetworld provides an online contractor/supplier management database designed to meet internal and governmental health, safety, and environmental requirements. ISNetworld Review and Verification Services (RAVS) validate contractor/supplier information. ISNetworld communicates health and safety standards and provides a method for subscribers to house documents, measure, compare and benchmark health and safety statistics, and provides a method of evaluation and communication between companies and their contractors. Contractor/suppliers also use the system to manage training and record keeping requirements. For more information, visit www.isnetworld.com.
