To Whom It May Concern:

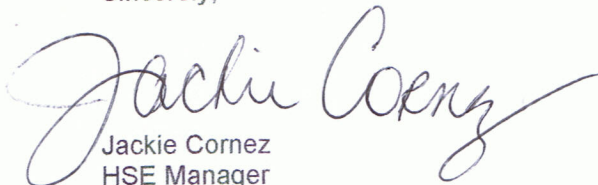

Acadian Contractors is an oilfield construction company whose goal is to provide our customers with products and services which meet or exceed standard industry expectations, applicable codes and customer specifications while maintaining a safe working environment for all customers and employees. In 2007, our company began utilizing ISNetworld to house our information, in order to meet the health and safety requirements of over 15 Owner Clients. During this time, we have found several functions of ISNetworld, including Training Manager, to be extremely beneficial to our company.

ISNetworld's Training Manager tool allows our company to manage all of our in house trainings. Due to Training Manager's flexibility, our company is able to customize the system to fit our company's needs. Although this feature is not required by any of our Owner Clients, we have found this function to be extremely helpful for internal reporting purposes.

In addition to Training Manager, our company has found several other benefits that are included in our ISNetworld subscription. Due to ISN's compatibility, we are able to fill out just one online questionnaire, the SCQ-V, as well as submit our safety program and training documentation into one central location, in order to comply with over 15 Owner Client's requirements. This has saved our company countless hours of inputting our company's information.

ISNetworld truly makes complying with the requirements of our Owner Clients and tracking our training information much easier. If I can answer any of your questions regarding ISNetworld, please feel free to contact me at (337)892-3346 or by email at jcornez@acadiancontractors.com.

Sincerely,

Jackie Cornez
HSE Manager
