To Whom It May Concern:

Shortgrass Ecosystems Ltd./1065615 Alberta Ltd., performs barbed wire fencing, vegetation control, land reclamation, and hydro-seeding services to companies throughout the Petrochemical Industry in Canada. We pride ourselves on keeping up to date with today's provincial health and safety standards and providing Owner Clients with the most qualified workforce in the industry. We feel that the integrity of our company is not only based on our work performance but also on our standard of safety excellence.

We pride ourselves on the safety and quality control we provide to our Owner Clients. We have been operating within the industry since November of 2005 and have always had less than ten employees. Even with a small company, we always deliver our services in a timely fashion and the quality of our performance is never shy of the expectations.

In August of 2008, we joined ISNetworld at the request of EnCana Oil & Gas Partnership. Over the past two years, we have seen the prequalification process become more standardized and less time consuming. ISNetworld allows us to house our health and safety documentation in one central location and ensures that we are always up to date with what Owner Clients require.

Shortgrass Ecosystems Ltd has made it a point to take advantage of the added benefits ISNetworld provides. The Review and Verification Services (RAVS) component ensures that our HSE and Insurance documentation is accurate and readily available to Owner Clients. With ISNetworld's help, we have taken safety within our company to a new level.

Overall, ISNetworld is an effective and convenient resource, allowing us to efficiently house our health and safety information in one central location. The database is very straight forward and user friendly.
