Attention: To Whom It May Concern

Subject: ISNetworld

Fisher Powerline Construction Ltd. is an aboriginally owned company local to the Wood Buffalo Area in Northern Alberta, Canada.

On a variety of Oil Sand Sites, while maintaining focus on safety, cost, and the importance of continuously delivering on schedule, Fisher PLC offers construction and maintenance services for both overhead and underground, distribution and transmission systems and sub-stations, utilizing both cold and hot line work methods at various voltages.

The management and staff at Fisher PLC are committed to achieving our goal of zero accidents and incidents. To this end we strive for continuous improvement, which is one of the reasons that we joined ISNetworld in April of 2009.

The benefits of ISNetworld were almost instantaneous, as we were quick to realize that the proverbial "bar" had been raised when we were apparently not looking. To ensure compliance with provincial and federal legislation, we had numerous improvements to make to our Safety Policies and Procedures.

Another benefit was that the gap between Owner Client requirements and expectations versus our perceived ability to meet these requirements and expectations was bridged. The gap analysis not only identified areas where there existed opportunities for improvement, it also revealed a structured solution. Although overwhelming at first, with the support of the staff at ISNetworld, we were quickly on the road to meeting the various Owner Client requirements.

Additionally, with the ongoing ISNetworld checks and balances, we are better positioned to adapt necessary measures in order to maintain full compliance as required. And, while the monitoring of changes to the various legislative requirements and the timely notification of any subs-standard conditions that may arise out of these changes is important, it also takes us one step closer to reaching our goal of zero accidents or incidents.

Bay 8, 122 Millennium Drive Fort McMurray AB, T9K 2S8

Fax: (780) 791-1905

In closing, I would recommend ISNetwork to any vendor that truly wants their safety policies and procedures to align with industry standards, various pieces of federal and provincial legislation and with the expectations and requirements of the world class Owner Clients that ISNetwork continues to attract.

Feel free to contact me directly should you have any questions or concerns or visit us at www.fisherplc.ca.

Sincerely,
