To Whom It May Concern:

I would like to take this opportunity to express my appreciation to ISNetworld for the services they have offered our company over the past seven years. L.E. Bell Construction Company has been with ISNetworld since its foundation in 2001. In that time, I have seen them expand from a system strictly offering Operator Qualification management to an all-inclusive health, safety, and procurement database. Through this development, they have revolutionized the OQ management and contractor prequalification process.

It has been my pleasure to be involved in this growth process. I have had the opportunity to provide feedback to the ISNetworld Team through contractor round table meetings, Users Group Meetings, and when speaking to the Customer Service Team on the phone. The ISNetworld Team is always willing to accept this feedback and implement my suggestions.

ISNetworld offers contractors the full package. One piece of the package that our company has particularly benefited from is our American Record Keeping (ARK) account. Anytime we need Operator Qualification reports submitted, my ARK representative is available and eager to help meet my Owner Clients' OQ requirements.

The benefits that we receive from the total ISNetworld system far outweigh the subscription costs. ISNetworld is truly an industry leader striving to improve health and safety practices across the board. I look forward to continuing to be involved in this development.

Sincerely,

Handwritten signature of Steve Barker in blue ink.
