

June 11, 2009

To Whom It May Concern:

There is a definite need in Australia to standardise the contractor prequalification process. In January of 2009, I was introduced to ISNetwork, a tool that will greatly assist in streamlining this process.

Through the ISNetwork database, I am able to submit and store a number of items including my health and safety policies. I can proudly say that we were one of the first contracting companies in Australia to earn a 100% RAVS Review Score on our safety programs. I found the RAVS process to be the following:

- Convenient – With the resources and links available we are able to quickly access the legislation applicable to our programs.
- Simple and user-friendly – I was able to complete the self review and upload my programs quickly and easily with no problems.
- Informative – The RAVS team provides useful, relevant feedback to assist in improving our protocols.

I am glad Chevron has chosen to utilize ISNetwork and wish that more of my clients would take advantage of the benefits ISNetwork has to offer. If you have any questions, I would be happy to discuss my experience with ISNetwork.

Sincerely,
