

June 1, 2011

Jack A. Farrior, Inc. Steel Works, located in eastern North Carolina, is a custom metal fabrication and millwright company specializing in all phases of bulk material handling and miscellaneous steel fabrications in carbon, stainless steel and aluminum materials. Our company provides design, engineering, custom fabrication of conveyors, duct, structural, miscellaneous steel, chutes, bins and hoppers and field installation services.

Our field construction and millwright crews are accustomed to working safely in a wide variety of light to heavy industrial settings, such as feed and grain facilities, pulp and paper, power and cement plants, etc.

We originally subscribed to ISNetworld in 2009 to prequalify for a customer. The initial enrollment was very thorough; however, throughout the initial enrollment process ISNetworld's employees were always willing to assist us. They are always very professional and helpful.

The RAVS Program is a valuable tool in showing our customers that our Safety Policies and Procedures meet our Owner Client requirements. Our Safety Manual is continually updated to meet the standards required by the industries for which we work.

Our marketing efforts have been enhanced. We have been approached by new, potential customers by being prequalified through ISNetworld

There are many programs available through ISNetworld which I am sure if utilized would be most valuable to any company.

Sincerely,

JACK A. FARRIOR, INC.

Susan Farrior
Secretary/Treasurer
