RE: ISNetworld Experience:

To Whom It May Concern,

Packers Plus is a high-value provider of technology-based solutions to the oil and gas industry. Packers Plus started operations in 2000, and is now working in numerous formations in Canada, the United States, the Middle East, West Africa, China, Europe, Mexico, and Argentina.

Our mission is to deliver innovative, high-end completions technology solutions that work the first time. Operational excellence, innovation, and customer intimacy make up our core values. Packers Plus recognizes that our quality is not only measured by employee experience, performance, and technical knowledge, but also their commitment and dedication to safe work practices. The Packers Plus Work Safe program demonstrates our company's culture and core values.

We utilize ISNetworld to measure and communicate safety practices, both internally and with our customers. The completion of the comprehensive ISNetworld profile has assisted us in identifying opportunities to strengthen our safety, health, and environmental programs.

In our industry, efficiency is an absolute necessity; we save time and money by sharing data, interacting with customers, submitting insurance, and tracking personnel within this single resource.

ISN has consistently provided a helpful attitude, accurate diagnosis and concise solutions.

We recognize the potential for future growth through our continued association with ISN. Packers Plus is proud to join our customers, other industry leaders and thousands of contractors in using ISNetworld to communicate our commitment and dedication to safe operations and behaviors.

Best Regards,

Scott W. Stephens
