Dear Company,

We are pleased to announce that Seahawk Drilling and Energy Supply International have recently enhanced their business relationship with ISNetworld (www.isnetworld.com). ISNetworld serves as Seahawk Drilling's primary subcontractor information management system. As a result of this action, subcontractors performing services for Seahawk Drilling are required to become subscribers to ISNetworld. If your company is a current subscriber to ISNetworld, there is no additional fee; however, please ensure your company has completed the items below.

There is a nominal fee for this service. Seahawk Drilling believes the benefits to both parties will far exceed any associated costs. A more comprehensive list of contractor benefits is attached from ISNetworld.

Your company's ISNetworld subscription will provide Seahawk Drilling access to the following required information:

1. **Company Profile** – Populate your company's Dashboard in ISNetworld to include company contact information, office locations, work types performed, geography served, etc. This will provide Seahawk Drilling and other Owner Clients with your company's most current contact information at any time.
2. **Health, Safety and Environmental (HSE) Questionnaire Management** – ISNetworld contains the Management System Questionnaire (MSQ) which will be utilized to gather your company's HSE data. The MSQ will replace all previous Seahawk Drilling questionnaires sent to your company.
3. **Document Submittal** – Seahawk Drilling will use ISNetworld to track and verify your company's *Insurance Certificates, OSHA Forms, EMR Letters and Contracts/Agreements*. During your company's subscription set up, ISNetworld will explain how to submit these documents within your company's subscription and make them available online to Seahawk Drilling.
4. **Review and Verification Services (RAVS)** – ISNetworld RAVS will review your company's written health and safety program for conformance with regulatory and/or Seahawk Drilling standards. Your company will be required to submit to ISNetworld RAVS copies of your company's written health and safety program. Detailed instructions will be communicated during your company's subscription set up. ISNetworld RAVS will also verify your company's OSHA and EMR statistics and training documentation.

In order to be considered by Seahawk Drilling during the subcontractor services selection process, your company's subscription must be in place and all required data must be posted **by April 20, 2010**. This deadline also applies to all subcontractors currently performing work for Seahawk Drilling. For further details about ISNetworld, **please contact the ISNetworld Customer Service Team at (214) 303-4900 or (800) 976-1303 or visit their website at www.isnetworld.com.**

Your company's cooperation and participation in bringing this cost effective technology solution to our business relationship is appreciated. Seahawk Drilling and ISNetworld representatives will schedule Contractor User Group Meetings and Helpdesks throughout the year. All subcontractors who have met the above requirements for Seahawk Drilling will receive details of dates/locations of these meetings which will be held throughout the United States.

Sincerely,

Harry Barnes
HSE Manager
Seahawk Drilling
