

TransCanada Ravenswood Safety Qualification

ISNetworld

ISNetworld (ISN) is a vendor safety management database. Vendors subscribe to this service and manage their company safety information within their ISN membership on a quarterly basis. TransCanada selected ISN to provide a consolidated approach for streamlining the Contractor Safety Management Processes (CSMP). ISN provides products and services which enable TransCanada to independently and objectively manage the vendor safety prequalification requirements. This reduces TransCanada's administrative costs while satisfying regulatory compliance and company-specific safety prequalification requirements.

ISN is an excellent search tool for TransCanada and other owner/clients to find new vendors that already have safety programs loaded into the system for specific scopes of work. The database is user-friendly and streamlines the safety compliance and prequalification process. ISN benefits the vendor by increasing their exposure to other owner/clients and providing an excellent marketing tool for their company.

Vendors wanting to perform services for TransCanada are required to become subscribers to ISN. The subscription will provide TransCanada (and other Owner Clients) access to the following required safety information:

1. Company Profile - Populate your company's Dashboard in ISNetworld to include company contact information, office locations, types of work/industry classifications, geography served, etc. This will provide TransCanada and other Owner Clients with your company's most current contact information at any time.
2. EH&S Questionnaire Management – ISNetworld contains the Management System Questionnaire (MSQ) which will be utilized to gather your company's EH&S data.
3. Document Submittal – TransCanada will use ISNetworld to track and verify your company's OSHA Forms and EMR Letters.
4. Review and Verification - ISNetworld RAVS will review your company's written health and safety program for conformance with regulatory and/or TransCanada's standards. Your company will be required to submit to ISNetworld RAVS copies of your company's written health and safety program. ISNetworld RAVS will also verify your company's OSHA and EMR statistics.

Vendor Benefits of ISN:

ISN reduces the complexity of vendor prequalification and allows your safety record to speak for itself. Some of the benefits your company will receive include:

Increased marketing exposure to a broader base of clients:

Creating a searchable company profile, including industry and location
Centralizing all conformance items, contact, and marketing information via the Dashboard
Maintaining an online document library, providing instant access to Owner Clients

Availability of Industry Information:

Receiving email reminders prior to expiration of conformance information
Linking to relevant country specific industry resources
Accessing unlimited help desk support, toll-free

Streamlined conformance process:

Tracking recordable incidents and forms via SmartLog
Managing employee training, job history, and performance evaluations
Facilitating the completion of required questionnaire(s) for Owner Clients

Review and Verification Services (RAVS):

Written safety programs
OSHA forms
EMR Letters
Citation/Prosecution Search
