ISNetworld Participates in 2009 Annual NPRA Meeting

SAN ANTONIO, TX (March 26, 2009) – ISNetworld Senior Team Lead, Bonney Hodges and Safety Specialist Kevin McCartin presented at the 2009 National Petrochemical & Refiners Association Annual Meeting held in San Antonio, Texas. The Annual Meeting assembled together key executives and industry experts from refining and marketing organizations worldwide, as well as representatives from various technological backgrounds. Many of the NPRA members are current customers of ISNetworld.

Bonney presented during the first day of the conference by sharing the contractor management best practices ISNetworld has compiled over the years. The presentation focused on ISNetworld's role in the due diligence towards managing contractor safety information and how their safety initiatives play an important role in the workplace.

The conference hosted over 1,400 company executives to take part in the three day conference. 80 U.S. refining and marketing companies and more than 30 international refining companies attended the event. Current issues associated with the changing economy and its affect on the refining and petrochemical industry were the main focus. Industry experts and speakers shared their knowledge and expertise towards new developments affecting the petrochemical industry.

Bonney Hodges, Senior Team Lead of ISNetworld's Downstream Team, stated, "Speaking at this conference allowed ISNetworld to reach out and discuss health and safety initiatives with leading petrochemical companies and share our knowledge with these respectable organizations."

About ISNetworld

ISNetworld provides an online Contractor management database designed to meet internal and governmental health, safety, and environmental requirements. ISNetworld Review and Verification Services (RAVS) validate contractor information. ISNetworld has standardized health and safety communication and provides a method for subscribers to house documents, measure, compare and benchmark health and safety statistics, and provides a method of evaluation and communication between companies and their contractors. Contractors also use the system to manage training and record keeping requirements. For more information, visit www.isnetworld.com.
