ISNetworld Presents at American Society of Safety Engineers 2009 Conference

DALLAS (July 31, 2009) – ISNetworld Vice President Brian Callahan and Director Dag Yemenu presented at the annual 2009 ASSE Safety Conference and Exposition held in San Antonio, Texas.

The three-day professional development conference is considered one of the most important resources for safety, health and environmental professionals to stay abreast of the latest issues and trends in the profession. The 2009 conference drew approximately 5,000 attendees and exhibitors.

The ISNetworld presentation, ***Mitigating Risk through Decision Making: Contractor Management Best Practices***, gave session participants practical methods, best practices and case studies of specific ways major organizations have mitigated risk exposure associated with hiring contractors. Additionally, ISN addressed industry trends and presented a model for managing contractors' health and safety performance through leading and lagging indicators.

According to Yemenu, contractor management is an area that has continued to gain significant attention in recent years. "It was a privilege for us to share best practices and successful contractor management models we have seen be effective in the industry for years," said Yemenu. "The quantitative analysis results we presented provided insights gathered from ISNetworld's unique database. We were able to show, for example, analysis results correlating the quality of safety programs with safety performance indicating that contractors with well-written health and safety programs show a 25-percent lower incident rate than their peers without such written programs in place."

About ISNetworld

ISNetworld provides an online contractor/supplier management database designed to meet internal and governmental record keeping and compliance requirements. ISN collects health and safety, procurement, quality and regulatory information for more than 20,000 contractors/suppliers and 130 Owner Clients. Through its Review and Verification Services (RAVS), ISN's subject matter experts review and verify contractors'/suppliers' self-reported information, incorporating a level of due diligence to the process. Contractor/Suppliers also use the system to manage internal training and recording keeping requirements. For more information, visit www.isnetworld.com.
