BP Australia Selects ISN for Vendor Management *ISN expands client base in Australia*

SYDNEY, Australia (March 11, 2010)— BP Australia (BP) is turning to ISN for its vendor management reporting needs. ISNetworld will collect and verify BP's vendor information offering the resources for BP to select safe, reliable vendors.

One of the seven major petroleum refineries in Australia, BP's Bulwer Island Refinery is located in Queensland on an area of reclaimed land bordered by the Brisbane River and Boggy Creek and has a capacity of 101,000 barrels of oil per day. BP will utilise multiple facets of ISNetworld including the Management System Questionnaire (MSQ), and Review and Verification Services (RAVS) for safety programs, insurance certificates of currency, and Workers Compensation Premium Rates. "The new program will improve our procurement and HSE assurance on new vendors and existing contractors and offers extensive benefits to both BP and contractors involved," comments Maribel Pegler, BP Bulwer Island Refinery Health and Safety Superintendent.

ISN will provide BP vendors with assistance in meeting BP's health, safety, and procurement reporting requirements. "We look forward to fostering our relationship with both BP and their vendors," states Rory Callaghan, ISN Australia Team Lead. "As part of our efforts, we will work with BP to host vendor forums and meet with their vendors face-to-face to provide training and support."

"With the addition of BP, there is an increase in value to the current subscribed vendors and Owner Clients in Australia today," notes Brian Callahan, ISN Senior Vice President. "We are excited to see our Australian market grow and look forward to working with BP."

About ISNetworld

ISNetworld provides an online vendor management database designed to meet internal and governmental record keeping and compliance requirements. ISN collects health and safety, procurement, quality and regulatory information for more than 23,000 vendors and 140 Owner Clients. Through its Review and Verification Services (RAVS), ISN's subject matter experts review and verify vendors' self-reported information, incorporating a level of due diligence to the process. Vendors also use the system to manage internal training and recording keeping requirements. For more information, visit www.isnetworld.com.
