Braskem PP Americas, Inc. Selects ISNetworld for Contractor Management *ISN Expands Chemical Client Base*

DALLAS, Texas (May 21, 2010) – ISN is pleased to announce that Braskem PP Americas, Inc. has chosen ISNetworld as their solution to effectively and efficiently manage contractor information. Braskem will utilize ISNetworld's database and expertise to assist with the process of collecting and verifying health, safety and procurement-related information on contractors and connecting this information with key Braskem decision-makers. Moving forward, ISNetworld will serve as the primary tool to manage the Braskem contractor safety program.

Braskem, the largest petrochemical company in Brazil, recently added to its global expansion opportunities with the purchase of three subsidiary sites in the United States at the La Porte, Neal and Marcus Hook locations. Braskem, with headquarters in São Paulo, operates 18 chemicals plants worldwide with a capacity of over 11 million metric tons per year.

"ISN provides our contractors a means to assess, maintain and improve their HES programs and processes on a regular basis," said Tim Thompson, HES Manager. "We believe that by matching our HES programs and performance expectations with that of our contractors, our facilities will operate in a safe, reliable, and environmentally sound manner."

ISN looks forward to partnering with Braskem to further develop their contractor management program in the United States and ensure it is in line with their corporate objectives and goals.

"We are excited to see Braskem implement ISNetworld and uphold their excellent contractor safety process," said ISN Downstream Team Manager, Kim Cravens. "We continue to grow our client base in the chemical industry and look forward to working with the Braskem group."

About ISNetworld

ISNetworld provides an online vendor management database designed to meet internal and governmental record keeping and compliance requirements. ISN collects health and safety, procurement, quality and regulatory information for more than 24,500 vendors and 145 Owner Clients. Through its Review and Verification Services (RAVS), ISN's subject matter experts review and verify vendors' self-reported information, incorporating a level of due diligence to the process. Vendors also use the system to manage internal training and record keeping requirements. For more information, visit www.isnetworld.com.
