CONSOL Energy Selects ISNetworld for Contractor Management

ISNetworld expands in the Appalachian Basin

DALLAS (November 13, 2009)—ISNetworld announced that CONSOL Energy has chosen ISNetworld as its primary tool for contractor management.

CONSOL Energy is the largest producer of high-Btu bituminous coal in the United States. The company has evolved into a multi-energy producer of both high-Btu coal and gas and operates mines in six states.

CNX Gas Corporation, a CONSOL Energy subsidiary, operates more than 2,600 wells making it one of the largest independent natural gas exploration, development, and production companies in the country.

“We are excited to welcome CONSOL Energy as the newest US Mining Owner Client,” said Bonney Hodges, Senior Team Lead of U.S. Mining for ISNetworld. “The transition to the ISNetworld process aligns with the growth CONSOL has seen from a single-fuel mining company to a multi-energy producer. We look forward to assisting CONSOL with the standardization of their current contractor management processes.”

About ISNetworld

ISNetworld provides an online contractor/supplier management database designed to meet internal and governmental record keeping and compliance requirements. ISN collects health and safety, procurement, quality and regulatory information for more than 20,000 contractors/suppliers and 130 Owner Clients. Through its Review and Verification Services (RAVS), ISN's subject matter experts review and verify contractors'/suppliers' self-reported information, incorporating a level of due diligence to the process. Contractor/Suppliers also use the system to manage internal training and recording keeping requirements. For more information, visit www.isnetworld.com.
