CITGO Petroleum Corporation Selects ISNetworld for Contractor Management

Dallas, Texas, May 1, 2008 – ISN Software Corporation (ISN) announced today that CITGO Petroleum Corporation has selected ISN and ISNetworld to assist in enhancing its contractor management process. CITGO will be implementing ISNetworld corporate-wide throughout all of its terminals, refineries, and lubricant plants. Their implementation will utilize multiple facets within ISNetworld, including the ISNetworld Standardized Contractor Questionnaire (SCQ-V) and Review and Verification Services (RAVS) for safety programs and insurance certificates, as well as Operator Qualifications. ISNetworld will also be collecting and verifying contractor diversity certificates. CITGO will be the first Owner Client to utilize this service.

Established in 1910, CITGO became an early influence in the American petroleum industry. In 1990 it was completely acquired by Petroleos de Venezuela, S.A. (PDVSA) making CITGO a major force in the energy arena, operating 749,000 barrels per day of refining capacity. CITGO strives to be a benchmark company for health, safety, and environmental stewardship and has received several NPRA awards recognizing their safety efforts since 2002.

ISNetworld Vice President of Product Development, Saks Ishrat, commented, “This partnership between ISN and CITGO facilitates multi-level functionality on the company, site, and project levels. Through these capabilities, ISNetworld is the optimal tool for meeting CITGO’s multifaceted requirements.”

Brian Callahan, Vice President of Energy, stated, “We are proud to welcome CITGO Petroleum Corporation as one of the newest members to ISNetworld. We know that their implementation and use of ISNetworld will help maintain their continuous dedication to the health and safety of their employees and contractors.”

About ISNetworld

ISNetworld provides an online Contractor management database designed to meet internal and governmental health, safety, and environmental requirements. ISNetworld Review and Verification Services (RAVS) validate contractor information. ISNetworld has standardized health and safety communication and provides a method for subscribers to house documents, measure, compare and benchmark health and safety statistics, and provides a method of evaluation and communication between companies and their contractors. Contractors also use the system to manage training and record keeping requirements. For more information, visit www.isnetworld.com.
