ISNetworld Launches SmartLog Enhancements

Web-based System Enables Contractors to Efficiently Manage Injury, Illness and Near Miss Records

DALLAS (August 28, 2009) – ISNetworld (ISN) has launched the latest enhancements to SmartLog, its web-based tool that lets contractors track incidents efficiently. SmartLog's enhanced features give contractors a step-by-step process for tracking and recording injury, incident and near miss data throughout the year as well the ability to generate standardized forms and user defined reports.

SmartLog is available exclusively to ISNetworld member contractors for no additional fee, as part of their subscription.

"Accurately collecting, documenting, tracking and communicating all incidents, including near misses, is a vital step to understanding and proactively mitigating hazards in the work place", said Dag Yemenu, director of ISNetworld Review and Verification Services (RAVS). "The new SmartLog enhancements add capabilities in each of these areas. We are committed to providing value-added tools that incrementally enhance our contractors' safety and health management processes."

According to Sara Miers, RAVS safety analyst, using SmartLog saves contractors time and ensures the accuracy of recordkeeping processes and requirements, so they can stay focused on their businesses.

A few of the new SmartLog features include:

- Recording and tracking near misses in the U.S. and Canada (new for Canadian contractors)
- Determining incident classifications through a Decision-Making Tree
- Assigning corrective actions
- Ability to attach supporting documents and pictures
- Providing Event Rating Assessments
- Reporting capabilities
- Printing Aggregate Incident Reports and Summaries for multiple locations
- Email alerts and notifications

"Many of these enhancements are the result of feedback and suggestions we received from our customers," added Miers. "Our contractor customers are important to us. Listening and responding to them is one way we design tools with real value that will serve them better".

About ISNetworld

ISNetworld provides an online contractor/supplier management database designed to meet internal and governmental record keeping and compliance requirements. ISN collects health and safety, procurement, quality and regulatory information for more than 20,000 contractors/suppliers and 130 Owner Clients. Through its Review and Verification Services (RAVS), ISN's subject matter experts review and verify contractors'/suppliers' self-reported information, incorporating a level of due diligence to the process. Contractor/Suppliers also use the system to manage internal training and recording keeping requirements. For more information, visit www.isnetworld.com.
