Marathon Oil Company Selects ISNetworld for Contractor Management
ISN Expands Upstream Client Base

DALLAS, Texas (September 20, 2010) – ISN is pleased to announce that Marathon Oil Company has selected ISNetworld to enhance its contractor Health, Environment, and Safety (HES) management processes for its United States and Canadian-based Upstream contractors.

Headquartered in Houston, TX, Marathon is the fourth largest US-based integrated oil and gas company. In North America, Marathon sustains strong assets in Alaska, Powder River Basin, Bakken Shale, the Gulf of Mexico and the oil sands of Alberta. These assets along with its operations around the globe equate to 1.7 billion BOE of net proved liquid hydrocarbon, natural gas and synthetic crude oil.

“Marathon Oil Company is committed to a safe, clean, and responsible work environment,” said Jeffrey Burro, Contractor Safety Coordinator for Marathon. “We believe that implementing ISNetworld is the next step to achieving zero injuries for both our employees and contractors.”

“We are excited to partner with Marathon in their implementation of ISNetworld,” said Brittany Boynton, ISN Upstream Manager. “Their strong dedication to safety and the environment will provide for a seamless transition as we work together to accomplish Marathon’s contractor safety management goals.”

About ISN

ISN provides an online contractor management database, ISNetworld, which is designed to meet internal and governmental record keeping and compliance requirements. ISN collects health and safety, procurement, quality and regulatory information for more than 27,000 contractors and over 160 Owner Clients. Through its Review and Verification Services (RAVS), ISN’s subject matter experts review and verify contractors’ self-reported information, incorporating a level of due diligence to the process. Contractors also use the system to manage internal training and recording keeping requirements. For more information, visit www.isnetworld.com.
