ISNetworld Participates in 2008 OSHA Oil & Gas Safety Conference

Houston, TX, January 13, 2009 – ISNetworld participated in the planning committee for the 2008 OSHA Oil & Gas Safety Conference. ISNetworld worked closely with OSHA, the University of Texas Arlington, and other health and safety leaders in the industry.

The conference hosted over 785 participants who attended keynote addresses by notable speakers including Dean McDaniel, E. Scott Geller, John Drebingner, Charlie Morecraft, and Bum Phillips. The conference also hosted 36 breakout sessions on the conference theme of “People, Equipment, and Compliance”. ISNetworld Director Dag Yemenu and President Joseph Eastin presented at one of the breakout sessions.

ISNetworld President Joseph Eastin stated, “We were fortunate to have the opportunity to participate in this event and be a part of the planning committee. The committee members were an extraordinary group of people who are the key behind the resounding success of the conference. The level of participation and positive feedback received demonstrates there is a need for this kind of event and a desire for improving health and safety in the industry.”

The University of Texas at Arlington Assistant Vice President, Enterprise Development, Teresea Madden-Thompson, said, "It was an honor to have Joe Eastin and Tracy Steed on the planning committee and ISNetworld as one of our founding sponsors. Joe, Tracy and the rest of ISNetworld staff who volunteered played a critical role in the success of the first OSHA Region VI Oil and Gas Safety Conference."

About ISNetworld

ISNetworld provides an online contractor/supplier management database designed to meet internal and governmental health, safety, and environmental requirements. ISNetworld Review and Verification Services (RAVS) validate contractor/supplier information. ISNetworld communicates health and safety standards and provides a method for subscribers to house documents, measure, compare and benchmark health and safety statistics, and provides a method of evaluation and communication between companies and their contractors. Contractor/suppliers also use the system to manage training and record keeping requirements. For more information, visit www.isnetworld.com.
