PEMEX Selects ISN to Manage Operator Qualification Records

DALLAS (October 22, 2009)—PEMEX, Mexico's state-owned petroleum company, has selected ISNetworld to manage its pipeline operator qualification (OQ) records for its employees. PEMEX initiated communication with ISNetworld to discover how ISN is utilized to track OQ data.

PEMEX is the tenth largest oil company in the world in terms of revenue and is one of the few oil companies that develops at all levels of production. It is the sole supplier of commercial gasoline in Mexico and is the highest fiscal contributor to the country.

Today, ISNetworld tracks over 80 million owner qualification records. "We are excited to work with PEMEX," said Brian Callahan, vice president. "PEMEX's initiative to enhance the monitoring and tracking of worker qualifications on pipelines in Mexico is commendable. We are honored to be a part of this effort."

About ISNetworld

ISNetworld provides an online contractor/supplier management database designed to meet internal and governmental record keeping and compliance requirements. ISN collects health and safety, procurement, quality and regulatory information for more than 20,000 contractors/suppliers and 130 Owner Clients. Through its Review and Verification Services (RAVS), ISN's subject matter experts review and verify contractors'/suppliers' self-reported information, incorporating a level of due diligence to the process. Contractor/Suppliers also use the system to manage internal training and recording keeping requirements. For more information, visit www.isnetworld.com.
