ISNetworld Rewrite Schedule Set

Houston, TX, January 11, 2001 – ISN Software Corporation (ISN) announced today that ISNetworld must be re-written from SilverStream into Microsoft ASP. The re-write will be completed by mid-2001

Bill Addy, President of ISN, stated, “Unfortunately, the SilverStream product is not meeting our needs. Microsoft’s ASP product is faster, more reliable and more likely to be supported in the future. Moving ISNetworld from SilverStream to ASP will be expensive, but is a necessary step to ensuring a viable, long-term solution. The move to Microsoft ASP, combined with our Microsoft SQL server database, means that ISN has aligned itself with the global leader in software solutions.”

ISN Software Corporation, through its flagship ISNetworld product, automates the relationship between contractors and their owner/operator customers in America’s most capital-intensive industrial sectors. ISNetworld utilizes third party data wherever possible to create an added level of compliance record management and reporting integrity. For more information, visit www.isnetworld.com.
