Teck Coal Limited (Formerly Elk Valley Coal) Selects ISNetworld for Contractor Management

Dallas, TX, November 25, 2008– ISNetworld (ISN) announced today that Teck Coal Limited (Formerly Elk Valley Coal) has selected ISNetworld as their primary tool for contractor management.

Teck Coal Limited is the world's second largest exporter of seaborne hard coking coal which is ultimately used in the production of steel and small amounts of thermal coal. Their operations include six metallurgical coal mines in British Columbia and Alberta. The clean coal is shipped mainly by rail to Westshore and Neptune Terminals near Vancouver, British Columbia for shipment to over seas customers and to Thunder Bay Terminals in Ontario to customers in eastern North America.

Adrienne Turner, Director of Business Development in Canada, stated, "Teck Coal is dedicated to maintaining high safety within their facilities and with their contractors. We are confident their implementation and use of ISNetworld will only enhance these efforts. We are excited to continue to reach out to the mining industry in Canada."

ISNetworld Vice President Brian Callahan stated, "As we continue to help Owner Clients and contractor companies mitigate risk and improve safety performance, we look forward to our relationship with Teck and many others who touch the mining industry."

About ISNetworld

ISNetworld provides an online contractor/supplier management database designed to meet internal and governmental health, safety, and environmental requirements. ISNetworld Review and Verification Services (RAVS) validate contractor/supplier information. ISNetworld communicates health and safety standards and provides a method for subscribers to house documents, measure, compare, and benchmark health and safety statistics, and provides a method of evaluation and communication between companies and their contractors. Contractor/Suppliers also use the system to manage training and recording keeping requirements. For more information, visit www.isnetworld.com.
