Weyerhaeuser NR Company Selects ISNetworld for Contractor Management

Dallas, Texas, January 15, 2009 – ISNetworld announced today Weyerhaeuser NR Company has selected ISNetworld as its primary tool to enhance Weyerhaeuser’s contractor management processes. This implementation will utilize multiple facets of ISNetworld including the Standardized Contractor Questionnaire (SCQ-V) and Review and Verification Services (RAVS) for safety programs and insurance certificates

As one of the world’s largest forest products companies, Weyerhaeuser has advocated a unique approach to solving some of the world’s greatest challenges by utilizing trees and all of what they have to offer us. Their operations include, but are not limited to, the production of wood products for both residential and commercial applications and the production of cellulose fibers, which can be created into a durable plastic-like form for production of such things like helmets. Weyerhaeuser has also given back to the environment what the company has used by supporting and maintaining Timberlands, providing a major source of oxygen, recreation for people, clean water, and a natural habitat for wildlife.

Joseph Eastin, ISN President, stated, “Weyerhaeuser has proven their commitment to conduct business in a socially responsible manner and we are excited about their decision to come on board. We look forward to working with Weyerhaeuser as they continue their dedication to maintain a healthy working environment for their employees and contractors.”

ISN Vice President, Brian Callahan, added, “We are proud to have Weyerhaeuser as our newest Owner Client and to increase the use of ISNetworld within this sector. We look forward to implementing ISNetworld with Weyerhaeuser and their contractors.”

About ISNetworld

ISNetworld provides an online Contractor management database designed to meet internal and governmental health, safety, and environmental requirements. ISNetworld Review and Verification Services (RAVS) validate contractor information. ISNetworld has standardized health and safety communication and provides a method for subscribers to house documents, measure, compare and benchmark health and safety statistics, and provides a method of evaluation and communication between companies and their contractors. Contractors also use the system to manage training and record keeping requirements. For more information, visit www.isnetworld.com.
