3001 Knox Street, Suite 200  
Dallas, Texas 75205

August 26, 2008

To Whom It May Concern:

For over 35 years Bonnett's Energy Services, LP has developed a reputation for delivering excellent results in downhole servicing operations by combining state-of-the-art equipment and technology with some of the most skilled and knowledgeable operators in Western Canada. Along with delivering outstanding products and services, we also pride ourselves in maintaining an excellent safety record. ISNetworkd assists us in achieving this safety excellence by providing a central database to report all of our health and safety information including our COR, WCB Clearance letter, WCB rate sheet and safety programs to Owner Clients.

In our line of business, it is imperative that we stay up to date with Canadian OH&S regulations. ISNetworkd has not only helped our company comply with our Owner Clients' requirements and government regulations, they have also brought to our attention the areas our company needs improvements on, especially within our safety program. With ISNetworkd's help, we will continue to make improvements in our company's health and safety programs in order to ensure our company is meeting the highest safety standards.

The level of professionalism and service that ISNetworkd provides to its contractors and Owner Clients is far greater than any other contractor database in Canada. I strongly recommend ISNetworkd to anyone seeking a contractor database management system. Please feel free to contact our HSE department at (780)513-3400 or by email at [safety@bonnettsenergy.com](mailto:safety@bonnettsenergy.com) if you have any questions about our experience with ISNetworkd.

Sincerely,

Murray Toews  
CEO  
Bonnett's Energy Services, LP
