**WE SELL VALVE MAINTENANCE SOLUTIONS,
WE DELIVER PEACE OF MIND.**

April 23, 2010

To whom it may concern

Sealweld Corporation has been providing valve care solutions for over 40 years. Along with our Valve Pro Valve Technician Training and Certification Program Sealweld Corporation has maintained a high level of success for valve care solutions worldwide.

Due to Sealweld Corporations line area of expertise it was pertinent for us to join ISNetwork. Currently our company utilizes ISNetwork to submit our health and safety information to over 10 Owner Clients and also to assist in keeping the company's health and safety information up to industry standards.

ISNetwork has helped in raising our Safety standards through education and awareness. Through ISNetwork's Review and Verification Services (RAVS) component we have achieved a 100% score. Any situations that came about were addressed by the help desk in a timely matter. With the ability to submit our safety programs, insurance documents, and training documents to one location helps to satisfy all of our Owner Client requirements.

I enjoy attending the User Conference's in both Red Deer and Houston as it is a great tool for meeting new prospective clients and a good way to share information.

ISNetwork helps in keeping our safety program current and I would recommend ISNetwork to any contractor who needs to better manage their safety programs and maintain them at a high standard.
