

Ensuring Integrity of Education Programs for Health and Safety

Joe McClary, CEO
International Association for
Continuing Education and Training

Definitions

- Professional Education
VS.
- Training

Importance of Ensuring Integrity in Professional Education

(Especially in health and safety)

- Public protection
- Public confidence
- Economic stability
- Societal advancement
- Uniformity in professional credentialing

Individual and Industry Attitudes Toward Continuing Education

- Positive and engaging
Vs.
- Skeptical and contrary

The Need for Meaningful Regulation of Professional Education

- “Education is one of the only things people are willing to pay for and not receive.”
- The commodity can become compliance NOT the education.
- CE markets do not consistently regulate themselves based upon quality education and service.
- Regulation can come from government, the industry or both.

What needs to be regulated?

- Content (*regulator*)
- Instructional Design (*regulator and/or IACET*)
- Delivery (*regulatory and/or IACET*)

Characteristics of Strong Professional Education Programs (Learning Events, Courses etc.)

- Relevant
- Outcomes are tied to assessment
- Assessment is valid and reliable
- Rigor is appropriate
- Learner ID is verified
