Exterran Selects ISN for Subcontractor Management *ISN Expands Contractor Operator Client Base*

DALLAS, Texas (January, 2012) – ISN is pleased to announce Exterran as its newest Contractor Operator. Exterran and its subcontractors will be utilizing ISNetworld to begin centralizing health, safety, environmental and procurement data.

Exterran, headquartered in Houston, Texas, is a global market leader in natural gas compression, offering services in gas treatment, production equipment, power generation, critical process equipment and fabrication. Exterran offers delivery and startup of equipment, projects and services by integrating its product lines with in-house engineering and project management for a complete single-source solution.

With this same attitude in mind, Exterran chose to utilize ISNetworld as a single source solution to provide information to its clients as well as track prequalification information for its subcontractors.

“Exterran is committed to a safe and responsible work environment. ISN will help support our core principles while helping us manage the safety and procurement information for our new and existing contractors,” says Genia Romero, Exterran Corporate Safety.

Brandi Surine, ISN Director, stated, “We are proud to see the trend in general contractors looking to ISNetworld to assist with the prequalification of their subcontractors. The ISN Team will ensure the Exterran expansion within ISNetworld will prove to add value to the Exterran program, its employees and subcontractors.”

About ISN

ISN provides an online contractor management database, ISNetworld, which is designed to meet internal and governmental record keeping and compliance requirements. ISN collects health and safety, procurement, quality and regulatory information for more than 39,000 contractors and 240 Owner Clients. Through its Review and Verification Services (RAVS), ISN's subject matter experts review and verify contractor's self-reported information, incorporating a level of due diligence to the process. Contractors also use the system to manage internal training and recording keeping requirements. For more information, visit www.isnetworld.com.
