### ISN Publishes 2011 Oil and Gas HSE Performance Indicators Report

DALLAS (October 1, 2012) — ISN has published an Oil and Gas Health, Safety and Environmental (HSE) Performance Indicators Report for the year 2011. The comprehensive report provides a compilation of key health and safety performance indicators, including Total Recordable Incident Rates (TRIR), Days Away, Restricted or Transferred Rate (DART) and Fatality Rate information.

Data from about 20,000 contractors representing more than five billion work hours of activity in the U.S. Upstream (Exploration and Production), Midstream (Pipelines) and Downstream (Refining) industries is included in the report. The data presented is aggregated by North American Industry Classification System ([NAICS](#)) codes as well as by ISN Work Types for added level of granularity in the benchmarking information.

“The main purpose of this report is to provide contractors, suppliers and Owner Clients industry specific HSE performance data useful for accurately benchmarking their organization’s performance against that of their peers,” said Dag Yemenu, ISN Director of Data Analysis and Reporting. “The level of detail, coupled with the richness of the data used, makes the ISN report a relevant and unique source of benchmarking information for the industry.”

“Accurate benchmarking is a critical piece for driving performance improvement within organizations and the industry in general,” said Joseph Eastin, President of ISN. “We hope that the publication will provide valuable information to enable continual health and safety performance improvement efforts in the workplace.”

Active ISNetworld members can access the report as a value-added benefit of their membership [here](#).

#### About ISN

ISN provides an online contractor management database, ISNetworld, which is designed to meet internal and governmental record keeping and compliance requirements. ISN collects health and safety, procurement, quality and regulatory information for more than 43,000 contractors and 260 Owner Clients. ISN’s subject matter experts review and verify this information to assess the accuracy, relevance and timeliness of the data. Connecting Owner Clients with safe, reliable and sustainable contractors and suppliers around the globe allows these organizations to use ISN as an integral part of their management systems.
