J-W Energy Company and its Subsidiaries Select ISN for Contractor Management
Energy Client Utilizes ISNworld Contractor/Operator Subscription to Enhance Value

DALLAS (May 23, 2012) – ISN is pleased to announce J-W Energy Company has selected ISNworld to support the contractor management process for its service companies: J-W Power Company, J-W Measurement Company and J-W Wireline Company. The J-W Energy Company subsidiaries will utilize ISNworld to collect and verify safety and procurement-related information to ensure the safest and most reliable contractors are selected.

J-W Energy Company, headquartered in Addison, Texas, has maintained multiple ISNworld contractor subscriptions for half a decade. ISNworld enables J-W Energy Company and its subsidiaries to communicate safety and compliance information to over 51 client companies. As J-W Energy approaches their implementation of ISNworld, their experience as a contractor puts them in the ideal position to understand the benefits not only for their organization, but also for their contractors.

“ISN is an excellent tool to strengthen our program for contractor management. Our company is committed to professionally managing our business relationships by being safety-conscious and holding ourselves and our contractors accountable through appropriate risk management. ISNworld provides tangible benefits to the J-W Energy Company subsidiaries, our contractors and their respective stakeholders,” said John Daniels, Business Development Manager of J-W Energy Company.

“We are proud to work with J-W Energy Company and its service companies,” said Marie Anderson, ISN Upstream Senior Team Lead. “We look forward to a successful implementation and support J-W Energy Company’s contractor management goals.”

About J-W Energy Company

J-W Energy Company is an Energy Services and Energy Development Company comprised of six (6) distinct business units that specializes in natural gas compression, gas measurement, gas gathering and processing, cased-hole wireline services, exploration & production and oilfield equipment manufacturing. Services are offered to the oil and gas industry in the majority of the major U.S. natural gas basins.

About ISN

ISN provides an online contractor management database, ISNetwork, which is designed to meet internal and governmental record keeping and compliance requirements. ISN collects health and safety, procurement, quality and regulatory information for more than 42,000 contractors and 250 Owner Clients. Through its Review and Verification Services (RAVS), ISN's subject matter experts review and verify contractors' self-reported information, incorporating a level of due diligence to the process. Contractors also use the system to manage internal training and recording keeping requirements. For more information, visit www.isn.com.
