PVR Midstream Chooses ISNworld for Contractor Management
ISN Expands Natural Gas Midstream Client Base

DALLAS, Texas (July 1, 2011) – ISN is pleased to announce that PVR Midstream (PVR) has selected ISNworld to effectively manage and streamline its contractor management process for its natural gas midstream segment. PVR will utilize ISNworld to collect and verify health, safety and procurement-related information on its contractors.

PVR's midstream natural gas assets are located principally in Texas, Oklahoma and Pennsylvania and include more than 4,200 miles of natural gas gathering pipelines and seven processing systems with approximately 420 million cubic feet per day of capacity.

"ISN is pleased to have PVR join our client base in the midstream industry," said Jennifer Buckley, ISN Midstream Team Lead. "We are looking forward to working with PVR in its strong commitment to the health and safety of its employees and contractors."

"PVR's initiative to enhance a culture that protects and promotes employees' onsite health and safety at its facilities is admirable," said Brian Callahan, ISN Senior Vice President.

"Working with ISN will help PVR pursue its goals for safety and performance," said James Hegar, PVR's Director of Engineering and Construction. "We see great benefits for both PVR and all contractors involved."

About ISN

ISN provides an online contractor management database, ISNworld, which is designed to meet internal and governmental record keeping and compliance requirements. ISN collects health and safety, procurement, quality and regulatory information for more than 33,000 contractors and 210 Owner Clients. Through its Review and Verification Services (RAVS), ISN's subject matter experts review and verify contractors' self-reported information, incorporating a level of due diligence to the process. Contractors also use the system to manage internal training and recording keeping requirements. For more information, visit www.isn.com.
