TransMontaigne Joins Safety-Conscious Colleagues Using ISNNetwork ISN's Midstream Team Welcomes Denver-based TransMontaigne

DALLAS (August 28, 2012) —Pipeline and terminal company, TransMontaigne Partners LP (TransMontaigne), recently partnered with ISN to manage contractor health, safety and Operator Qualification (OQ) information.

TransMontaigne is a terminaling and transportation company headquartered in Denver, CO. The company owns 140 miles of liquid pipeline throughout Arkansas, Mississippi, Missouri, Texas and Virginia. Fully committed to providing an incident-free workplace, TransMontaigne strives to protect the health and safety of its employees, contractors and the communities in which it operates.

"TransMontaigne realizes that the continuity and safety of its operations are linked to the safe operation of its business partners," said Dudley Tarlton, Vice President of ESOH for TransMontaigne. "ISN will help us manage these important issues in a key part of our supply chain. Their experience in this area should make our program more effective."

Through its online database, ISNNetwork, ISN collects contractor information, reviewing for completion and accuracy to regulatory and best practice standards. Using ISN's Review and Verification Services (RAVS), TransMontaigne will monitor contractor health and safety programs, injury and illness statistics and experience modification rates to ensure conformance with its criteria. To maintain compliance with the U.S. Department of Transportation OQ regulation requirements, ISNNetwork will help monitor TransMontaigne's OQ records.

"Contractor safety and worksite productivity is a shared goal for TransMontaigne and ISN," said Brandi Surine, ISN Director of Energy. "As the practice of hiring contractors to work onsite continues to grow, ISN is pleased to see Owner Client organizations responding by broadening their safety cultures to include contractors. TransMontaigne is a welcome addition to the ISN Midstream sector."

About ISN

ISN provides an online contractor management database, ISNNetwork, which is designed to meet internal and governmental record keeping and compliance requirements. ISN collects health and safety, procurement, quality and regulatory information for more than 42,000 contractors and 260 Owner Clients. Through its Review and Verification Services (RAVS), ISN's subject matter experts review and verify contractors' self-reported information, incorporating a level of due diligence to the process. Contractors also use the system to manage internal training and record keeping requirements. For more information, visit www.isn.com.
